PROJECTS

Portfolio | [GitHub](#) | [Demo](#)

- This Portfolio Website project is a showcase of my skills, projects, and achievements, presented in the form of a modern and interactive website.
- React, HTML, CSS, JavaScript and Framer Motion are the technology used in this project
- The impact of portfolio project is a visually appealing and interactive website showcasing my skills and work.

Tour Guide Portal for Domestic Tourists | [GitHub](#)

- This Tour Guide portal for domestic tourists that includes user registration, login, state selection, and a map feature using the Google Maps API.
- HTML, CSS, MySQL, JavaScript and map feature using Google Maps API integration for route finding this are the technology used in this project.
- The impact of tour guide portal is that it provides a convenient and cost-effective solution to explore famous places, saving them time and money by eliminating the need for a human guide.

Informative Website on Mountain | [GitHub](#)

- This informative website showcasing mountains located in different directions (North, East, South, West), displaying details such as names, places, Height of mountain, and more.
- HTML, CSS and JavaScript are technology used to create a user-friendly website with a database of mountain
- The main impact of this project is to demonstrates my web dev skills and provides a valuable resource for users to learn about mountains, enhancing their knowledge and appreciation of these natural wonders.

WORK EXPERIENCE

TCS iON

Web Developer Intern

Noida, India

Jun 2022 – Aug 2022

- During my internship at TCS iON Noida, I developed a tour guide portal for domestic tourists.
- This portal included user registration, login, state selection, and a map feature using the Google Maps API. I utilized HTML, CSS, JavaScript, and integrated the Google Maps API for route finding.
- The impact of this project is that it offers a convenient and cost-effective solution for exploring famous places, eliminating the need for a human guide and saving time and money for users.

Next Education

Web Developer Intern

Noida, India

March 2024 – May 2024

- During my internship at Next Education, Developed and implemented report cards and certificates for the school using HTML and CSS.
- Uploading and managing student, staff, and school data provided by the institution in the Learning Management System (LMS).
- Maintaining the LMS, ensuring the integrity and accuracy of school data, and providing ongoing support and updates.
